- Sole coder
- *HTML, CSS,* JavaScript, GraphQL (Apollo server/client), Mongoose, bcrypt, crypto-js, JWT, Winston, React, Bootstap

EXPERIENCE

Strata Manager Body Corporate Services   2019 - 2022
PICA Group – Body Corporate Services   Chatswood, NSW & Noosa, QLD
Managed a portfolio of properties while maintaining positive working relationships with clients. This required detailed legal knowledge of strata legislation, managing financial accounts, resolving disputes and organising repairs and maintenance of body corporate buildings.
Key Accomplishments:
- Managed 50 strata schemes totalling over 700 lots in both NSW and QLD. This also required learning the different body corporate legislation for both states.
- Facilitated more than 150 Annual General Meetings and many Committee Meetings.

- *Nominated by the PICA Group for the Rising Star award for the annual Strata Community Association awards 2020*

Small Business Owner   2014 - 2019
Hospitality Business (Café/Functions)   Sydney CBD, NSW

With my partner, owned and operated a small hospitality business in Sydney's CBD between 2014 – 2019. I managed the financials, marketing, legal obligations as well as carried out maintenance and working back of house when required. I took a more active role in the business from 2017 during a career break until it was sold in 2019.

Key Accomplishments:
- Increased revenue by double digits year on year while successfully operating the business in a tough, competitive market.
- Successfully managed many functions and events

Product Manager   2008 - 2017
Optus Communications   Macquarie Park, NSW

Directed the life cycle of Optus' satellite media broadcast product portfolio with accountability of >$180m pa in revenue whilst achieving growth through a changing technology environment and maintaining revenue against a highly competitive market place.

Key Accomplishments:
- Increased revenue by 65% through enabling the resign of key multi-million $ broadcast contracts during the transition of analogue to digital TV. This required the development of a new state-of-the-art broadcast platform ("VAST – Viewer Access Satellite Television") and end to end new products to support it. *My contribution was recognised by executive management as a runner up at the annual CEO awards for 2011.*
- Managed the development of a new multi-million-dollar revenue stream for the Optus Wholesale business in support of Optus' major push into media with the launch of the English Premier League service. This development was critical in allowing commercial customers such as hotels, clubs, sporting & gaming establishments access to the Optus Premier League service.
- As "product owner", successfully led the agile scrum development project to support the implementation of a new satellite bolt on for the Optus English Premier League service.
